

Problem Identification

(Previously known as Solve Problems & Make Decisions at Supervisory Level)

Course Aim:

To identify key issues in problem situations to clearly articulate the problems at hand and propose contingency plans to resolve issues. Broadly, the learners are able to classify problems and associated implications as well as provide recommendations to resolve issues at hand.

Learning Objectives (what learners are able to do after training?)

- Identify symptoms that could lead to potential problem at the workplace.
- Articulate problems in a clear and concise manner
- Provide recommendations to resolve the issues at hand
- Apply logical deduction to anticipate and detect problems at the workplace
- Analyse relevant information surrounding the perceived problems
- Identify the exact problem using elimination process, objective reasoning or process questioning
- Analyse the root causes of the problems at the workplace using appropriate problem-solving tools and techniques
- Evaluate the effectiveness of implemented solutions and implementation plans by analysing feedback gathered from relevant sources
